## Music in the Home

Is an assurance of happiness, peace, contentment, harmony; it means a happy home. Father, mother, is there music in your home? Have you given your children a handsome Piano, around which the family and friends may gather and sing the song of "Auld Lang Syne?" Wouldn't this happy Christmas be a good time to

**Put a Piano in the Home for \$1.50**

a week with a first payment of only \$10. Such little payments make it easy to get one, and—do you think you are treating your family right not to provide a Piano for the home? See us to-day and let us talk this matter over.

## Kranich & Bach Piano

stands out prominently, alone and at the head of all classes because of its superiority of tone and construction. This famous Piano has greater length of strings, greater sounding board surface, greater tonal capacity, and larger open space behind the keys than any other Piano of equal dimensions. Not a screw or other metallic substance penetrates the soundboard or bridges, making sweetness and fullness of tone as time goes on. You know many pianos grow "old" with age. The Kranich & Bach grows newer. These are only a few of the many, many reasons for its great superiority.

## The Lester Piano is a Marvel of Construction.

It is all that a high-class instrument should be and meets absolutely every requirement that can possibly be made by both singer and player. The action is unusually accurate. The most delicate touch brings an immediate response, rich in tone and singing quality.

## THE CLUTTER PIANO.

A Modern Piano at a Moderate Price.

This is a Piano of special excellence at a very moderate price, indeed.

### The Clutter

is substantially made throughout of the best known materials to withstand this damp climate. All bass strings are copper and are genuine copper wound, which will prevent rust and thereby lengthen its life. The tone is rich, mellow and delightful. We know the Piano is as good as we recommend it to be—'twould be bad business policy to give it our name if not absolutely true in every detail. Will be delighted to show it to you.

## The Vocation Organ

For Congregational Singing, is undoubtedly entitled to the distinction of "Leader." The tone is distinctively its own, the organ throughout being designed on scientific knowledge of vocal accompaniment. Congregations or other bodies having need of an organ are cordially invited to call, or drop a note that you are interested and our representative will call and see you.

Victor Talking Machines and Edison Phonographs afford endless entertainment and amusement for the home or audience. The Victor Talking Machine is easily at the head of all disc machines and may be had from \$18.50 up. The Edison Phonograph is so well known that a statement of its merits is unnecessary. It is "the only" cylinder machine and may be had for \$10 up. They make admirable Christmas gifts. Disc \$1.00 Records now 60 cents. We carry a full line of stringed instruments and musical supplies, and hope you will call on us for your musical needs.
